

## PPS600 – Advanced XLPublisher

One to four-day on-site instructor-led courses designed to consolidate the XLPublisher user's existing knowledge and to enhance and maximize their report writing and analytical skills using the PrecisionPoint Business Warehouse Modules.

### Prerequisites

Learners need a working knowledge of Excel and XLPublisher and a network connected PC with XLPublisher installed and activated.

Learners should have previously completed a modular PrecisionPoint course (PPS300/400/500).

### Audience

The target audience for this course is business power users, report writers and business analysts working with the PrecisionPoint Business Warehouse; users who already have a fundamental understanding of the XLPublisher Tool.

### Content

Advanced courses can be tailored to suit specific business needs but might typically cover the following:

- Review of existing XLPublisher reports
- Advanced dimension selection tools
- Creating KPIs and calculated members
- Linking multiple reports
- Advanced report formatting
- Applying conditional reporting
- Incorporating basic MDX commands.
- Adding charts and graphical elements
- Report enhancements & streamlining
- Exporting calculated dimension members

### Goals

To consolidate the learner's existing abilities at designing purposeful multi-dimensional reports from the PrecisionPoint Business Warehouse Modules.

After completing the course, learners will typically be able to:

- Create advanced calculated dimension members in XLPublisher
- Improve on their existing complex reports
- Train new staff how to use XLPublisher
